1. Overview

Professional Standard: Environment Specialism Working in the Community Environment

This Professional Standard outlines the Environment Specialism of Working in the Community Environment and the essential knowledge and skills that are needed to meet the requirements of the sector minimum deployment standards.

Note: “Professional Standard: Environment Specialism” will be abbreviated throughout this document to “Environment Specialism”, the reader should understand this abbreviation as the full title.

The full version of this standard is available to CIMSPA education and employer partners. It provides guidance for the development of educational products that will be endorsed by CIMSPA.

The Working in a Community Environment Specialism covers job roles that sit within the physical activity sector as part of all industries.

This CIMSPA Environment Specialism allows you to demonstrate your expertise in working in the community environment.

This Professional Standard: Environment Specialism can be used as follows:

1. Combined with an occupation standard to form an educational product: e.g. Occupation: Manager; Environment Specialism: Working in the Community Environment.
2. Combined with an occupation standard and additional specialism(s) to form an educational product: e.g. Occupation: Coach; Environment Specialism: Working in the Community Environment; Population Specialism: Working with Children.
3. As a standalone product that can be completed as continuing professional development: e.g. working in the community environment.

Endorsed qualification logo

Qualifications that meet the requirements of this CIMSPA professional standard will display this official CIMSPA endorsement logo.

2. Scope of Working in the Community Environment

This Environment Specialism supports an individual who is working and engaging within the local community.

Individuals that meet this standard will:

UNDERSTAND:

- The contextual background, needs, challenges and opportunities of the local community linked to sport, physical activity, health and well-being.
- The place or space including: legislation, where can you be active, community and leaders.
- The influencers within the area including: people, culture and customs.
- How to communicate, engage and facilitate individuals/groups to build trust and capacity within the local community.
- Empowering the community to develop programmes and activities.
- Understanding the network of organisations available for signposting and other support mechanisms.
- Reflecting the needs of the local community.

HAVE DEMONSTRATED:

- A community-led approach.
- Contribution to the evaluation of the effectiveness of provision on the local community.
- A range of different approaches, tools and engagement in response to an area or challenge within the community.
- How to empathise with a range of different people and needs within the local community.
- An ability to facilitate and collaborate provision, to deliver a range of opportunities within the community.

This Professional Standard outlines the environment specialism's knowledge and skills.

3. Summary of knowledge and skills

Working in the Community Environment

Topic	Knowledge and understanding	Skills
Understanding the community	<ul style="list-style-type: none">• The demographic of the area (different individuals and groups) within the local community.• How to engage and build rapport with different groups to develop provision specific to their needs.• The different benefits of lifestyle behaviour change for people and societies, for example drug and alcohol management, smoking cessation and healthy eating.	
The community environment	<ul style="list-style-type: none">• The different community environments and the current provision available.• Awareness of the key organisations (private, public, voluntary) within the local area that can support the development of sport, physical activity, health and wellbeing.• The geographical make-up of the area and how this can be utilised to develop provision with the local community.• The different networks in the local community: e.g. formal and informal.• How to communicate, engage and utilise local networks to collaboratively support the local community.	
Principles of behaviour change	<ul style="list-style-type: none">• How to influence people's attitude towards physical activity and health and wellbeing including group and community behaviour change: e.g a culture shift or behaviour change in group environment.• How to identify potential barriers and perceived barriers that affect engagement and participation in physical activity.• How to recognise different types of changes in motivation.	<ul style="list-style-type: none">• Empathy with groups and individuals and their relationships with physical activity.• Enable and motivate individuals and groups to engage with physical activity and behaviour change.

Topic	Knowledge and understanding	Skills
Community engagement and activation	<ul style="list-style-type: none"> • Know what the community needs are to develop programmes that allow engagement within the local community that promotes sustainability and retention. • Know how to support long term community engagement in programmes that promote sustainable development. 	<ul style="list-style-type: none"> • Create a positive environment that attracts individuals/groups in the community. • Select and adapt appropriate activities to engage individuals/groups within the local community. • Reflect on own performance and projected sustainability of programmes using feedback received from other organisations and individuals/groups within local communities.

4. Product development guidance

This section is aimed at organisations developing formal educational products mapping to this Environment Specialism. The guidance should be considered in the development of all educational products seeking CIMSPA endorsement.

The CIMSPA Professional Development Board (PDB) has agreed any of the formal educational products listed in the table below can be developed for the Environment Specialism, Working in the Community Environment. Where evidence that all elements of the Environment Specialism are included, CIMSPA endorsement can be sought.

Educational product	Mapping requirements	Professional Standard Environment Specialism achieved on attainment?
Regulated vocational qualification	Fully mapped	YES
Apprenticeship programme	Fully mapped	YES
HE programme/modules	Fully mapped	YES
CPD programme/modules	Partially mapped	NO

All formal educational products that are seeking CIMSPA endorsement must be submitted to CIMSPA and should include all elements outlined in the Environment Specialism and assessed in line with the intention of the standard.

Education providers seeking CIMSPA endorsement for a product against this Environment Specialism are asked to consider the following:

- a) They determine and justify the level of the product they have developed, in line with regulator guidance. To ensure parity, the level for all educational products that fully map to this Environment Specialism should be the same.

The level assigned is determined by leading awarding organisations currently offering qualifications in the sector in which the role resides.

This is not a first-to-post exercise but one in which education providers are invited to submit their levelled units/full qualification for review as part of the CIMSPA endorsement process.

Once agreed by CIMSPA, all subsequent fully-mapped educational products must conform to the level set for this Environment Specialism.

Level descriptors set out the generic knowledge and skills associated with the typical holder of a qualification at a given level and it should be ensured that educational products fully mapping to this Environment Specialism are a 'best-fit' for the level assigned.

- b) Their quality assurance meets the appropriate regulator's guidance, including internal and external quality assurance, staffing requirements and assessment generation and evidence.

- c) They stipulate practical assessment must be conducted, where practically possible, in a real-world environment: for example, 'on the job' or at work. For someone Working in the Community Environment this could include club facilities, leisure centres, sports halls, swimming pools, outdoors, or other appropriate spaces.
- d) Where possible a practical end-point assessment is conducted with 'real participants'.

The use of peers for an end-point practical assessment is not deemed appropriate.

5. Learning and development requirements (LDRs)

The LDRs outline the key areas of learning and assessment that should be contained within any educational product seeking CIMSPA endorsement against a professional standard. There are 4 key areas of learning and development for an individual working in the Community Environment, of which all areas are interconnected and mandatory. The key areas are:

1. Understanding the community.
2. The community environment.
3. Principles of behaviour change.
4. Community engagement and activation.

N.B. Examples are given within the LDRs to provide an overview of the knowledge and skills most relevant to the role; it is not mandatory to assess learners against 100% of the examples provided, however, sufficient coverage to ensure occupational competence on achievement must be ensured. This will be reviewed as part of the CIMSPA endorsement process.

1. Understanding the community

Ref	Knowledge and understanding:	Those working in the community environment must:
K1.1	Customs and cultures	<ul style="list-style-type: none"> • Know the importance of cultures and customs for individuals and groups. • Know how the cultures and customs impact on community liaison and cohesion.
